Education

2028

Information Technology | B.Tech
Netaji Subhas University of Technology (NSUT)

CGPA: 7.94 | Current Year: 2nd, Semester: 4

Skills

~ LANGUAGES

C++ (Strong in Data Structures & Algorithms)
JavaScript

~ BACKEND

FastApi, REST APIs, JWT Authentication

~ DATABASE

PostgreSQL, SQLAlchemy

~ CS FUNDAMENTALS

OS
CN
System Design
DBMS
OOPS

~ TOOLS

Git, GitHub

Projects

Front-end Developer YouTube Clone

YouTube Clone – Responsive Frontend Web Application

HTML, CSS, JavaScript

- Developed a responsive YouTube-inspired frontend interface with sidebar navigation, video cards, and search layout.
- Built reusable UI sections using modern CSS layout techniques including Flexbox.
- Improved frontend development skills through responsive design implementation and component structuring.

Projects

PRESENT

Budgetify – Personal Finance & Expense Tracking Platform

Tech Stack: FastAPI, Python, PostgreSQL, SQLAlchemy, JWT, Chart.js

- Built a backend-driven expense tracking application with secure user authentication and RESTful APIs using FastAPI.
- Implemented JWT-based authentication with access and refresh tokens, password hashing, and protected routes.
- Designed relational database models for users, expenses, and budgets using PostgreSQL and SQLAlchemy ORM.
- Developed CRUD operations, pagination, monthly expense analysis, and category-wise spending insights.
- Added budget monitoring features with dynamic status analysis (Safe/Warning/Danger) based on user spending patterns.
- Integrated analytical APIs for monthly comparisons, top spending categories, and graphical visualization support.
- Structured the project using modular architecture and reusable API components for scalability and maintainability.

Achievements & Other Work

- Qualified JEE (Joint Entrance Examination) for engineering admission, demonstrating strong analytical and problem-solving abilities.
- Strong DSA practice: Solved 400+ problems consistently on LeetCode and GeeksforGeeks, focusing on algorithms, data structures, and optimization techniques.
- Actively practicing algorithms, backend development, and system design.
